

Coursera Capstone Project

Data Section

Data

The following data was used to solve the problem

- A list of suburbs around Ankara, Çankaya city . The neighborhoods of the Project is defined by the suburbs of Çankaya .
- The latitudes and longitudes coordinates of mentioned suburbs which will be used in plotting the maps and acquiring the venue of data .
- Venue data is going to be retrieved from Foursquare .
- The trending businesses and overwhelming businesses is going to be shown in analysis .

Source of The Data

The source of the data is both wiki and municipality web site of Ankara which is www.nufusune.com/cankaya-mahalleleri-koyleri-ankara . I will retrieve the whole information , suburbs , about Ankara, Çankaya . and also i will get the locations informations,venue informations from Foursquare Api .
